

RADI TOLOGY GETHER

The upcoming meeting of the radiology residents on topic 'Emergency Radiology', which takes place on the 2nd and 3rd of June, is the sixth in a row since 2016. Our goal is to gather specialists and residents in the field of Radiology, as well as colleagues of other fields, whose point of view is of great aid and is highly appreciated. Once again, the event is organized under the auspices of the Bulgarian Society of Cardiothoracic Radiology. Diverse lectures, intriguing cases and interactive workshops will be held that aim to enrich the knowledge of the audience and to introduce new trends and guidelines. The participation of foreign guest-lecturers is a novelty to the Radiology Together meetings, which is a sign that our organization is constantly developing and that the young radiologists are aspiring to broaden their horizons.

Moreover, another innovation is the preparation of an abstract booklet, which will make the participants familiar with the discussed topics. In this endeavor Medical University - Varna plays a major role, as it will carry out its publishing. We are proud to announce that the European Accreditation Council for Continuing Medical Education (EACCME) grants the event with 9 European CME credits (ECMEC).

The event is supported by Bracco, Siemens, Bayer, GE and Software Company, for what we are extremely thankful.
