

The event titled **“How to Write an Article: The Editors’ Experience”** took place on the 19th and 20th October 2018 in Acibadem City Clinic Tokuda Hospital. The conference was organized by **Radiology Together** with the support of the Bulgarian Society of Cardiothoracic Radiology and was certified by UEMS for 10 CME credits.

There were more than 120 people registered in advance and more than 30 registered on-site.

During the course of two days the participants had the chance to attend 9 lectures and an interactive workshop. The lecturers were leading experts in the field of medicine, publishing, creating and funding projects and research, medical statistics and pharmacology, coming from five different European countries.

Both during and after the event a lot of positive feedback was received and the organizers believe that the conference was very useful and necessary considering the scarcity of options for additional training in this field for the young medical students and doctors.

“This was a unique event! It was just as useful for us, the students, as it was for residents and medical specialists. The atmosphere was nice, the lecturers too. I was left with very good impressions and I want to thank the organizers for making It happen. I think more events like this one are needed!” – Mervin Bodur, 5th year medical student, Medical University – Sofia

“Great organization – you managed to turn the meeting into a multidisciplinary European congress. Keep going and we will support you by always taking part!” – Dr. Dayana Yankova, radiology resident, UH “ Lozenets”, Sofia

“I’m glad I didn’t miss this congress. The lecturers were very useful and the organization on a very good level!” – Nikolay Kahchiev, 5th year medical student, Medical University – Sofia

“The event was very well organized. The foreign lecturers all presented their lectures very well and in such a comprehensible way that they were useful and interesting even for a person like me who is not yet engaged in any research or publishing”- Desislava Ilieva, radiology resident, UH “Sveta Anna”, Sofia
